- MCA (Master Of Computation Application)

CH. CHARAN SINGH UNIVERSITY

Dev Bhoomi Group Of Institutions, Saharanpur   **2019-2022**

- BCA (Bachelor Of Computation Application)

PROJECTS

E-COMMERCE WEBSITE

Currently working on an e-commerce project, focusing on building a dynamic and user-friendly platform. The project involves creating features such as product listings, shopping cart functionality, user authentication, and secure payment processing. The goal is to provide a smooth and efficient online shopping experience for users.

BUDGET TRACKER

Developed a budget tracker project to help users manage their finances by tracking income, expenses, and savings. The application allows users to categorize transactions, set budget goals, and view detailed reports and charts for better financial management. The goal is to provide a user-friendly tool for monitoring and improving personal financial health.

USER MANAGEMENT SYSTEM

Developed a simple User Management System with basic functionality, including user authentication, profile image upload, and CRUD (Create, Read, Update, Delete) operations. Implemented email notifications using Nodemailer for user registration and password recovery. Integrated pagination for displaying users in a list, providing a streamlined and efficient way to manage user data while ensuring security and performance.

SPOTIFY CLONE

Developed a simple Spotify clone using React.js, allowing users to search for songs, create playlists, and listen to music. The project focuses on replicating the basic features of a music streaming platform with a clean, user-friendly interface and dynamic content display.
